Safety Data Sheet in accordance with HSNO

1 Identification of the substance or mixture and of the supplier

Product identifier

This Safety Data Sheet has been prepared in accordance with the New Zealand Hazardous Substances and New Organisms Act 1996 (HSNO) and as amended.

Other means of identification

- Trade name: U900 CAVITY WAX
- · Article number: W041
- · Relevant identified uses of the substance or mixture and uses advised against
- · Sector of Use

SU3 Industrial uses: Uses of substances as such or in preparations at industrial sites

- SU22 Professional uses: Public domain (administration, education, entertainment, services, craftsmen)
- · Product category PC9a Coatings and paints, thinners, paint removers
- · Process category PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities
- · Environmental release category ERC2 Formulation into mixture
- · Article category AC1 Vehicles
- · Application of the substance / the mixture Bitumen coating Surface protection

Details of the supplier of the safety data sheet

- Manufacturer/Supplier: HB BODY S.A. B' ENTRANCE BLOCK 50 DA9 & MB6 Str THESSALONIKI INDUSTRIAL AREA 57.022. SINDOS THESSALONIKI, GREECE Ph: +30 2310 790 000 Fax: +30 2310 790 033 www.hbbody.com email: hbbody@hbbody.com
- [•] Further information obtainable from: Wyatt Machine Tools (Rupes) NZ Limited Address: 388 Church Street, Penrose, Auckland Ph (09) 525 1000; Fax (09) 525 1009 Emergency telephone number: NZ Emergency 0800 992 881 (0800WYATT1) Emergency telephone number:
- 24 hr Medical Emergency, National Poisons Centre, 0800 764 766 (0800 POISON)

2 Hazards identification

Classification of the substance or mixture

GHS02 flame

Flammable liquids Category 2

H225 Highly flammable liquid and vapour.

GHS08 health hazard

Page 2/12 Date of issue: 20.01.2025 Revision date: 20.01.2025 Version no. 1

Trade name: U900 CAVITY WAX

Reproductive toxicity Category 2H361 Suspected of damaging fertility or the unborn child.Specific target organ toxicity - repeated exposure CategoryH372 Causes damage to the central nervous system1through prolonged or repeated exposure.

GHS07

Skin irritation Category 2

H315 Causes skin irritation.

Hazardous to the aquatic environment chronic Category 3 H412 Harmful to aquatic life with long lasting effects. Additional information:

- 6.3A Substances that are irritating to the skin
- 9.1C Substances that are harmful in the aquatic environment
- 6.9A (Repeated exposure)-Substances that are toxic to human target organs or systems
- 6.8B Substances that are suspected human reproductive or developmental toxicants

Label elements

- · GHS label elements The product is classified and labelled according to the Globally Harmonised System (GHS).
- · Hazard pictograms

GHS02 GHS07 GHS08

- Signal word Danger
- · Hazard-determining components of labelling:
- Low boiling point hydrogen treated naphtha
- toluene
- · Hazard statements
- H225 Highly flammable liquid and vapour.
- H315 Causes skin irritation.
- H361 Suspected of damaging fertility or the unborn child.
- H372 Causes damage to the central nervous system through prolonged or repeated exposure.
- H412 Harmful to aquatic life with long lasting effects.
- Precautionary statements
- P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P241 Use explosion-proof [electrical/ventilating/lighting] equipment.
- P260 Do not breathe dust/fume/gas/mist/vapours/spray.
- P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].
- P405 Store locked up. P501 Dispose of conte
 - Dispose of contents/container in accordance with local/regional/national/international regulations.

Other hazards

- [·] Results of PBT and vPvB assessment
- This product contains no substance that is considered to be persistent, bioaccumulating or non toxic(PBT). This mixture contains no substance that is considered to be very persistent or very bioaccumulating (vPvB).
- · PBT: Not applicable.
- · vPvB: Not applicable.

3 Composition/Information on ingredients

Chemical characterisation: Mixtures

· Description: Mixture of hazardous substances listed below with nonhazardous additions.

[·] Dangerous components:

CAS: 64742-82-1	Low boiling point hydrogen treated naphtha	40-<45%
EINECS: 265-185-4	Flammable liquids Category 3, H226	
Index number: 649-330-00-2	Specific target organ toxicity - repeated exposure Category 1, H372;	
	Aspiration hazard Category 1, H304	

CAS: 64742-49-0 EINECS: 265-151-9 Index number: 649-328-00-1	Naphtha (petroleum), hydrotreated light Flammable liquids Category 2, H225 Aspiration hazard Category 1, H304 Hazardous to the aquatic environment chronic Category 2, H411 Skin irritation Category 2, H315	10-<15%
CAS: 64742-95-6 EINECS: 265-199-0 Index number: 649-356-00-4	 Solvent naphtha (petroleum), light arom. Flammable liquids Category 3, H226 Aspiration hazard Category 1, H304 Hazardous to the aquatic environment chronic Category 2, H411 Acute inhalation toxicity Category 4, H332; Specific target organ toxicity - single exposure Category 3, H335 Specific target organ toxicity - single exposure Category 3, H336 	10-<15%
CAS: 8052-42-4 EINECS: 232-490-9 RTECS: CI 9900000	Asphalt	1-<5%
CAS: 108-88-3 EINECS: 203-625-9 Index number: 601-021-00-3 RTECS: XS 5250000	 toluene Flammable liquids Category 2, H225 Reproductive toxicity Category 2, H361; Specific target organ toxicity - repeated exposure Category 2, H373; Aspiration hazard Category 1, H304 Skin irritation Category 2, H315; Specific target organ toxicity - single exposure Category 3, H336 	0-<0.9%
Additional information:	For the wording of the listed hazard phrases refer to section 16.	

Additional information: For the wording of the listed hazard phrases refer to section 16.

4 First aid measures

Description of first aid measures

- · General information: Immediately remove any clothing soiled by the product.
- [•] After inhalation: In case of unconsciousness place patient stably in side position for transportation.
- · After skin contact: Immediately wash with water and soap and rinse thoroughly.
- · After eye contact: Rinse opened eye for several minutes under running water.
- · After swallowing: If symptoms persist consult doctor.

· Information for doctor:

· Most important symptoms and effects, both acute and delayed No further relevant information available.

- Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

5 Fire fighting measures

[•] Extinguishing media

Suitable extinguishing agents:

CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

• For safety reasons unsuitable extinguishing agents: Water with full jet

Special hazards arising from the substance or mixture

- During heating or in case of fire poisonous gases are produced.
- [•] Advice for firefighters

Firefighters should always protective equipment and breathing apparatus when handling fire coming from these products

- [•] Speial protective equipment and fire fighting procedures: Mouth respiratory protective device.
- Additional information

Collect contaminated fire fighting water separately. It must not enter the sewage system. HAZ CHEM CODE: 3YE

6 Accidental release measures

Personal precautions, protective equipment and emergency procedures

Mount respiratory protective device.

Page 4/12 Date of issue: 20.01.2025 Revision date: 20.01.2025 Version no. 1

Trade name: U900 CAVITY WAX

- Wear protective equipment. Keep unprotected persons away.
- Environmental precautions:

Do not allow product to reach sewage system or any water course. Inform respective authorities in case of seepage into water course or sewage system. Do not allow to enter sewers/ surface or ground water.

Methods and material for containment and cleaning up:

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose contaminated material as waste according to section 13. Ensure adequate ventilation.

[•] Reference to other sections

See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

7 Handling and storage

Handling:

- Precautions for safe handling Ensure good ventilation/exhaustion at the workplace. Open and handle receptacle with care. Prevent formation of aerosols.
- Information about fire and explosion protection: Keep ignition sources away - Do not smoke.
 Protect against electrostatic charges.
 Keep respiratory protective device available.

Conditions for safe storage, including any incompatibilities

- · Storage:
- · Requirements to be met by storerooms and receptacles: Store in a cool location.
- · Information about storage in one common storage facility: Not required.
- Further information about storage conditions: Keep container tightly sealed.

Store in cool, dry conditions in well sealed receptacles.

• Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

Control parameters

Ingredients with limit values that require monitoring at the workplace:

8052-42-4 Asphalt

WES (New Zealand) Long-term value: 0.5 mg/m³ skin, fumes

108-88-3 toluene

WES (New Zealand) Short-term value: 377 mg/m³, 100 ppm Long-term value: 75 mg/m³, 20 ppm skin, oto, bio
IOELV (EU) Short-term value: 384 mg/m³, 100 ppm Long-term value: 192 mg/m³, 50 ppm Skin

Regulatory information

WES (New Zealand): Workplace Exposure Standards and Biological Exposure Indices IOELV (EU): (EU) 2019/1831

· Additional information: The lists valid during the making were used as basis.

Continue on page 5 NZ Page 5/12 Date of issue: 20.01.2025 Revision date: 20.01.2025 Version no. 1

Trade name: U900 CAVITY WAX

- **Exposure controls**
- · Personal protective equipment:

General protective and hygienic measures: Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing Wash hands before breaks and at the end of work. Store protective clothing separately. Avoid contact with the skin. Avoid contact with the eyes and skin.

· Respiratory protection:

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use selfcontained respiratory protective device.

· Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

- [.] Penetration time of glove material
- The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.
- · For the permanent contact gloves made of the following materials are suitable: Fluorocarbon rubber (Viton)
- For the permanent contact of a maximum of 15 minutes gloves made of the following materials are suitable:

Rubber gloves

· Eye protection:

Tightly sealed goggles

· Body protection: Protective work clothing

9 Physical and chemical properties

Information on basic physical and chemical properties

- [·] General Information
- · Appearance:
- · Form:
- · Colour:
- · Odour:
- · Odour threshold:
- [·] pH-value:
- Change in condition
- · Melting point/freezing point:
- · Initial boiling point and boiling range:
- · Flash point:
- · Flammability
- · Autoignition temperature:
- · Decomposition temperature:

Fluid According to product specification Characteristic Not determined. Mixture is non-soluble (in water).

Undetermined. 60 °C < 0 °C Highly flammable. 296 °C Not determined.

Continue on page 6

[·] Ignition temperature:	Product is not selfigniting.
Explosive properties:	Risk of explosion by shock, friction, fire or other sources of ignition.
Explosion limits:	
· Lower:	0.7 Vol %
· Upper:	7.5 Vol %
·Vapour pressure at 20 °C:	370 hPa
Vapour pressure:	
[.] Density at 20 °C:	0.873 g/cm ³
[.] Relative density	Not determined.
· Vapour density	Not determined.
Evaporation rate	Not determined.
Solubility in / Miscibility with	
· water:	Not miscible or difficult to mix.
 Partition coefficient: n-octanol/wate 	r: Not determined.
· Viscosity:	
[.] Dynamic at 20 °C:	66-69 mPas
· Kinematic at 20 °C:	76-79 mm²/s
[·] Solvent content:	
· Organic solvents:	23.2 %
· VOC (EC)	564.6 g/l
 Solids content (volume): 	77.0 %
Other information	
Particle characteristics	Not applicable.
[.] Physical state	Liquid

10 Stability and reactivity

- **Reactivity** No further relevant information available.
- [•] Chemical stability
- Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.
- * Possibility of hazardous reactions No dangerous reactions known.
- · Conditions to avoid No further relevant information available.
- · Incompatible materials: No further relevant information available.
- · Hazardous decomposition products: No dangerous decomposition products known.

11 Toxicological information

[·] Information on toxicological effects

[·] Acute toxicity

*

· LD/LC50 values relevant for classification:

ATE (Acute Toxicity Estimates)

Inhalative LC50/4 h >89.2 mg/l (rat)

64742-95-6 Solvent naphtha (petroleum), light arom.

 Oral
 LD50
 >6,800 mg/kg (rat)

 Dermal

 >3,400 mg/kg (rab)

 Inhalative
 LC50/4 h >10.2 mg/l (rat)

108-88-3 toluene

Oral	LD50	5,000 mg/kg (rat)

Dermal LD50 12,124 mg/kg (rabbit)

Inhalative LC50/4 h 5,320 mg/l (mouse)

Page 7/12 Date of issue: 20.01.2025 Revision date: 20.01.2025 Version no. 1

Trade name: U900 CAVITY WAX

- · Primary irritant effect:
- · Skin corrosion/irritation Irritant to skin and mucous membranes.
- · Serious eye damage/irritation No irritating effect.
- · Respiratory or skin sensitisation Sensitising effect through inhalation is possible by prolonged exposure.
- · Additional toxicological information:

The product shows the following dangers according to the calculation method of the General EU Classification Guidelines for Preparations as issued in the latest version: Irritant

• CMR effects (carcinogenity, mutagenicity and toxicity for reproduction) Reproductive toxicity Category 2

12 Ecological information

[·] Toxicity

· Aquatic toxicity:

This product is not toxic for the aquatic life. Nevertheless do not dispose the product or any cleaning solvents used along with this product into the sea

Persistence and degradability

This prouduct contains polyesteric molecules and organic solvents and is not known to be bioaccumulative. It can be considered as biodegradable in small quantities. In case of disposal, it should be treated as a hazardous material and should be disposed accordingly. Do not just throw it away

Behaviour in environmental systems:

- · Bioaccumulative potential No further relevant information available.
- · Mobility in soil No further relevant information available.

Ecotoxical effects:

· Remark: Harmful to fish

[•] Additional ecological information:

[·] General notes:

Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water Do not allow product to reach ground water, water course or sewage system.

Danger to drinking water if even small quantities leak into the ground.

Harmful to aquatic organisms

Results of PBT and vPvB assessment

· PBT: This product contains no substance that is considered to be persistent, bioaccumulating or non toxic(PBT).

· vPvB: This mixture contains no substance that is considered to be very persistent or very bioaccumulating (vPvB).

• Other adverse effects No further relevant information available.

13 Disposal considerations

Waste treatment methods

[.] Recommendation

Must not be disposed together with household garbage. Do not allow product to reach sewage system.

Uncleaned packaging:

[•] Recommendation: Disposal must be made according to official regulations.

Annex: Exposure scenario

Short title of the exposure scenario

[.] Sector of Use

- SU3 Industrial uses: Uses of substances as such or in preparations at industrial sites
- SU22 Professional uses: Public domain (administration, education, entertainment, services, craftsmen)
- Product category PC9a Coatings and paints, thinners, paint removers
- · Process category PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities
- · Article category AC1 Vehicles
- · Environmental release category ERC2 Formulation into mixture
- Description of the activities / processes covered in the Exposure Scenario See section 1 of the annex to the Safety Data Sheet.
- . Conditions of use According to directions for use.
- · Duration and frequency Frequency of use:

[•] Physical parameters

The data on the physical - chemical properties in the Exposure Scenario is based on the properties of the preparation.

- · Physical state Fluid
- · Concentration of the substance in the mixture The substance is main component.
- [·] Used amount per time or activity Smaller than 100 g per application.

Other operational conditions

- · Other operational conditions affecting environmental exposure Use only on hard ground.
- Other operational conditions affecting worker exposure Take precautionary measures against static discharge. Keep away from sources of ignition - No smoking.

Avoid contact with the skin.

[•] Other operational conditions affecting consumer exposure No special measures required.

• Other operational conditions affecting consumer exposure during the use of the product Not applicable.

Risk management measures

- [·] Worker protection
- Organisational protective measures

Ensure good ventilation. This can be achieved by using a local exhaustion or general exhaust system. If these measures are insufficient to keep the solvent vapour concentration below the workplace limit, wear an adequate respiratory protective device.

• Technical protective measures Provide explosion-proof electrical equipment. Use product only in enclosed systems.

Ensure that suitable extractors are available on processing machines

· Personal protective measures

Do not inhale gases / fumes / aerosols.

Avoid contact with the skin.

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation Pregnant women should strictly avoid inhalation or skin contact.

[·] Measures for consumer protection Ensure adequate labelling.

Observe consumer information and advice on safe use.

[·] Environmental protection measures

· Water

Do not allow to reach sewage system. Dispose of this product and its container at hazardous or special waste collection point.

Do not allow to reach sewage system.

Continue on page 12 NZ

Page 12/12 Date of issue: 20.01.2025 Revision date: 20.01.2025 Version no. 1

Trade name: U900 CAVITY WAX

- · Soil
- Prevent contamination of soil.

The product is only processed over the concrete collecting basin.

- . Disposal measures Ensure that waste is collected and contained.
- [·] Disposal procedures
- Must not be disposed together with household garbage. Do not allow product to reach sewage system.
- · Waste type Partially emptied and uncleaned packaging

• Exposure estimation

[.] Consumer

This product is to be used by professional technitians only. Not relevant for this Exposure Scenario.

Guidance for downstream users

Whether the downstream user acts within the scope of the Exposure Scenario can be verified based on the information in sections 1 to 8.
