

Product Description

Menzerna Premium Power Cut 200 is the ultimate cutting compound for gelcoat, CFRP, GFRP and other composites and plastics with maximum grinding effect and the latest technology. PPC 200 removes sanding marks, yellowing, clouding and signs of wear in the shortest possible time without damaging the surface. Premium Power Cut 200 does not contain any aggressive solvents and is therefore very user-friendly.

Cut:										10
Gloss:					6					

Color:	White
Density:	About 1,3 kg/l
Storage:	5-30 °C, avoid frost and direct sunlight
Application:	Rotative
Recommended speed:	1200-1800 rpm
Maximum grinding removal:	P600-P800
Pad recommendation:	Double-sided lambswool pad Crater Shaped Lambswool Pad

Surface options:

- Gelcoat
 - Topcoat
 - GFRP, CFRP-Composites
 - Perspex
 - PE-reisin
 - Boat paints
- And many more!

Recommended Usage

1	Clean surface thoroughly.
2	Shake the bottle and apply about 15 g of polishing compound to the double-sided lambswool pad.
3	Work in a crossing motion. Apply strong, even pressure during polishing and run the product at a consistently low speed. When the product has been evenly distributed and worked into the surface after a few seconds, increase the speed. Work over as large an area as possible to reduce heat build-up at certain points.
4	The polish is completely applied when only a slightly transparent or oily film is visible.
5	Remove polish residues with a microfibre cloth. Optionally, clean with Menzerna Control Cleaner to check the polishing result.
6	Sanding and wear marks are now removed. If required for a glossy surface, e.g. when working on dark paints, apply a Menzerna finish product to remove any holograms and polishing marks.

The Menzerna-System

	1. Heavy Cut	2. Medium Cut	3. Finish	4. Protection
Standard products	PPC 200		SF 3500	
	MA 30			
	Cut Force Pro			
Marine products	PPC 200			
	GC One-Step-Polish		GC Premium Gloss	GC PP

Volumes

Bottle, plastic, 1 litre	24017.281.001
